SUMMARY

Final-year B.Tech Computer Science student, most recently a Software Developer Intern at Zentek Infosoft, specializing in backend engineering with Node.js, Express, and MongoDB. Experienced in secure, production-style REST APIs – JWT/OAuth authentication, RBAC, payment integration, and concurrency-safe data handling – on a strong Java and DSA foundation. Immediately available for Backend or Full-Stack Software Engineer roles.

SKILLS

Languages: Java, JavaScript, Python, SQL

Backend: Node.js, Express.js, REST APIs, API Development, JWT & Google OAuth, RBAC, Rate Limiting, Razorpay Payments

Databases: MongoDB (Mongoose), MySQL – Schema Design, Indexing, Aggregation

Frontend: React.js, Tailwind CSS, HTML5, CSS3

Tools & Platforms: Git, GitHub, Postman, Cloudinary, Render, Vercel, Netlify

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, API Security, Concurrency Control

EXPERIENCE

Software Developer Intern

May 2026 – August 2026

Zentek Infosoft

Jaipur, Rajasthan

- Developed full-stack features across React front-ends and Node.js/Express back-ends over MongoDB and MySQL.
- Designed RESTful APIs with JWT authentication, Google OAuth, and role-based access control, securing protected routes and user data.
- Collaborated through Git-based workflows on debugging, feature delivery, deployment, and API performance optimization.

Frontend Developer Intern

June 2024 – July 2024

ShadowFox

Remote

- Developed three responsive, mobile-first web projects using HTML, CSS, and JavaScript.
- Built accessible, interactive UI components to improve user experience and engagement.

PROJECTS

YoCart – Full-Stack E-Commerce Marketplace | Node.js, Express.js, MongoDB, React.js, Razorpay, Recharts

Link

- Built a full-stack MERN marketplace with customer, vendor, and admin roles across 15+ RESTful resource groups, secured with JWT (httpOnly cookies), Google OAuth, RBAC middleware, rate limiting, Helmet headers, and validation against NoSQL injection and IDOR flaws.
- Integrated Razorpay payments with HMAC-SHA256 signature verification and server-side amount re-validation to block price-tampering and fraudulent order creation.
- Engineered concurrency-safe checkout using atomic compare-and-decrement updates to prevent overselling under simultaneous orders, with multi-item rollback on partial failure.

Expense Tracker | Node.js, Express.js, MongoDB, React.js

Link

- Built REST APIs with Node.js/Express and MongoDB for persistent income and expense management.
- Implemented transaction categorization, dashboard analytics, and real-time summaries using MongoDB aggregation.

Thana-Thaya Food Ordering Website | HTML5, Tailwind CSS, JavaScript

Link

- Built a responsive food-ordering website with interactive menu browsing and a persistent cart via LocalStorage.
- Implemented dynamic quantity controls, smooth animations, and a simulated checkout with Google Forms order collection.

EDUCATION

Poornima University

2023 – 2027

B.Tech in Computer Science / CGPA: 7.96

Jaipur, Rajasthan

Delhi Public School

2022 – 2023

12th CBSE Board / Percentage: 64%

Pali, Rajasthan

ACHIEVEMENTS

Solved 70+ Data Structures & Algorithms problems in Java across LeetCode, GeeksforGeeks, and HackerRank, spanning arrays, strings, linked lists, trees, and dynamic programming.
